

“Sea Sonic Electronics announces the new non-PFC ATX series”

Features:

Specification compliance: ATX 2.03 & ATX 12V v1.2
Super low noise fan control
(S²FC: Smart & Silent Fan Control)
EMI/RFI compliance: FCC part 15 class B
Safety compliance: TUV, C-UL , CB, N, S, D & FI
Efficiency: 80% typical

SS-250FS, SS-300FS, SS-350FS

[Taipei Taiwan-April 25, 2002] With the announcement of the new series of non-PFC ATX models, Sea Sonic Electronics now provide complete ATX series to satisfy the demand from both PFC and non-PFC markets. To meet the trend of power-up, and to serve non-PFC markets, Seasonic non-PFC series for ATX form factor has been extended. The power range is now extended from 250~300w to 250~350w. The newly developed non-PFC ATX series adherents the same quality and reliability expected from a Seasonic power supply. Samples will be available by beginning of May.

More details about advantages of the new Seasonic non-PFC ATX series are listed below:

✓ **Intel & AMD compatible:**

1. Meets Intel ATX (v2.03) / ATX 12V Power Supply Design Guide v1.2
2. Meets AMD Athlon™ Processor System Power Supply Requirements for ATX v1.0

✓ **S²FC (Smart and Silent Fan Control) design:**

Seasonic's S²FC design is a unique circuit implemented on board to lower the power supply's fan noise, thereby reducing your total system noise level. This special circuit allows the Seasonic power supplies to be amongst the quietest PC power units on the market today and still maintain all governmental safety approvals (C't magazine Germany, WinPC Japan & Obering, Berg & Lukowiak test agency, Germany). For more information about Seasonic S²FC, welcome to contact seasonic website or seasonic sales.

Sea Sonic Electronics Co., Ltd., a Taiwan based designer and manufacturer of switch mode power supplies has more than 25 years of experience in the PC market. Sea Sonic has branch offices in Europe & USA and production facilities in China and Taiwan.
